

LAB REPORT # 5

Title:-

Tension in the string,
and SHM.

Experiment:-

Find coefficient of constant k in hooke's law using a mass spring system.

Apparatus :-

A spring, A magnetic pole, three weights, a calculator, a board and a thread.

Procedure :-

1. Place the spring pole on the magnetic board.
2. Check for zero errors by attaching the holders with the spring using a thread.
3. Note down the zero error if any.
4. Place the first mass m_1 on the holder and note the distance in meters.
5. Repeat the same step for other two masses m_1 and m_2 .
6. Now calculate the force F_1 , F_2 , F_3 for the three masses.

Now plot a graph using the forces and distance in meters.
Calculate the value of coefficient k using formula.

$$k = \text{Slope} = \frac{\Delta y}{\Delta x}$$

$$k = \frac{F_2 - F_1}{x_2 - x_1}$$

Zero - Error :-

$$Z.E = 13 \text{ mm}$$

$$Z.E = 13 \times 10^{-3} \text{ m}$$

$$Z.E = 0.013 \text{ m}$$

For Mass m_1 :-

$$m_1 = 20 \text{ g}$$

$$m_1 = 0.02 \text{ kg} \underline{\underline{Ans}}$$

$$x_1 = 19 \text{ mm}$$

$$x_1 = 19 \times 10^{-3} \text{ m}$$

$$x_1 = 0.019 \text{ m} - 0.013 \text{ m}$$

$$x_1 = 0.006 \text{ m} \underline{\underline{Ans}}$$

$$F_1 = m_1 g$$

$$F_1 = 0.02 \times 9.8$$

$$F_1 = 0.196 \text{ N} \underline{\underline{Ans}}$$

For Mass m_2 :-

$$m_2 = 50 \text{ g}$$

$$m_2 = 0.05 \text{ kg} \underline{\underline{Ans}}$$

$$x_2 = 28 \text{ mm}$$

$$x_2 = 28 \times 10^{-3} \text{ m}$$

$$x_2 = 0.028 \text{ m} - 0.013 \text{ m}$$

$$x_2 = 0.015 \text{ m} \underline{\underline{Ans}}$$

$$F_2 = m_2 g$$

$$= 0.05 \times 9.8$$

$$F_2 = 0.49 \text{ N} \underline{\underline{Ans}}$$

For Mass m_3 :-

$$m_3 = 10 \text{ g}$$

$$m_3 = 0.01 \text{ kg}$$

$$x_3 = 17 \text{ mm}$$

$$x_3 = 17 \times 10^{-3} \text{ m}$$

$$x_3 = 0.017 \text{ m} - 0.013 \text{ m}$$

$$x_3 = 0.004 \text{ m}$$

$$F_3 = m_3 g$$

$$F_3 = 0.01 \times 9.8$$

$$F_3 = 0.098 \text{ N}$$

Graph:-

$$\begin{aligned} \text{Slope} = K &= \frac{\Delta y}{\Delta x} \\ &= \frac{F_2 - F_1}{x_2 - x_1} \\ &= \frac{0.49 - 0.19}{0.015 - 0.006} \\ &= \frac{0.3}{0.009} \end{aligned}$$

$$K = 33.3$$

Ans -
