

ICT Assignment 1
Course Instructor: Safina
Total Marks 10
Due Date: 05.03.2023

Question 1

Like books and movies, the computer software is protected by a Copyright. A copyright is a form of legal protection that grants certain exclusive rights to the author of a program. In addition to copyright protection, computer software is often protected by the terms of a software license. The software may also be distributed under shareware or freeware.

You are required to investigate the following:

- What is a Copyrighted Licensed Software? Give examples along with license information.
- What is shareware software? Read license of a shareware software and identify the differences between a commercial software (Copyrighted Software) and shareware software. Give examples.
- Find the titles of at least two shareware programs and two commercial programs for each of the categories in the table below. Expand the table by providing the required information for each software. Give the reference of your source of information.

| Category | Program Names | Shareware/Commercial | Retailers or vendors | Prices |
|----------------|---------------|----------------------|----------------------|--------|
| Word Processor | | | | |
| Spreadsheet | | | | |
| Database | | | | |
| Graphics | | | | |
| Utility | | | | |

Question 2

What is a multimedia application? Find out at least five multimedia applications. For each application, list its title, publisher and a short description of what it does. Also provide the reference of your source.
